PROJECTS

E Commerce Site   04.2023 – 08.2023
This web application, developed using JSP and Servlets, enables users to shop for products online. JSP creates dynamic web pages, while Servlets manage server-side tasks like order processing and product management. Users can explore products, add items to a cart, and securely complete transactions on the website.

QR Code Reader   05.2023 – 08.2023
This project building web app using HTML, CSS, and JavaScript involves several key steps. Ensure that HTML structure includes elements for the camera feed and QR code display, with CSS styling to create an appealing layout. JavaScript to access the user's camera using Media Devices API.

Flat Purchase   03.2022 – 08.2022

Project developed using the Odoo software falls under the category of Enterprise Resource Planning (ERP) systems. It primarily serves to connect two main user roles: the user and the admin. The project's objective is to facilitate the process of flat selection, ordering, and management, particularly for users in Dubai.
